

# EUROPEAN UNION Investing in our Future European Regional Development Fund

The construction of the new ToolBed-Factory in Germany in 36160 Dipperz is financed with funds from the European Regional Development Fund.

In addition to creating additional full-time jobs, the investment aims to improve the company's sustainable development. Thanks to the new energy-efficient building, ToolBed GmbH has become a carbon-neutral company using climate-friendly technologies (PV system + battery storage + heat pumps, etc.).
